

# Industry Leaders Adopt ANT+ Interoperability

**ANT+ Ecosystem:** Current ANT+ device profiles collect, transfer and track:

 Heart rate data.	 Blood pressure data.	 Blood glucose data.	 Personal weight and body composition data.	 Activity monitor data.
 Step count data.	 Running/walking speed data.	 Data from fitness equipment.	 Position data.	 Bicycle power data.
 Bicycle cadence data.	 Bicycle speed data.	 Speed data from non-stride based sensors.	 Remote control for music devices.	 Light electric vehicle data.
 Geocache.	 Personal fall and emergency response.
